

Letter of Appreciation

Shahidul Islam
Principal
Mandia Anchalik College Mandia

16 June 2026

On behalf of The Climate Project Foundation, we extend our sincere appreciation to Mandia Anchalik College for the active participation in the Global Week of Action (June 1–7, 2026), observed under the theme “Clean Energy, Cooler Planet.”

In line with World Environment Week and marking 20 years of The Climate Reality Project, campuses were invited to take action under the theme of Clean Energy. The college contributed meaningfully to this effort, encouraging students to take part in clean energy initiatives and spreading awareness beyond campus.

We particularly acknowledge college’s efforts in integrating creativity, dialogue, and collective action. The plantation drive fostered responsibility for a greener campus, while the art competition on clean energy showcased student innovation. The formal meeting and discussions on solar energy and sustainable practices further deepened awareness.

As you collaborate with us under the Green Campus Programme, we look forward to building on this momentum and working together to embed sustainability practices more deeply in education and community life.

Aditya Pundir
